THE CONNECTED DISTRIBUTION CENTER

Delivering operational and business excellence across the enterprise.

- From assets to the enterprise, gain unparalleled visibility and agility to drive efficiency and optimize decision making.

Make the digital transformation

- Visualize trends
- Gain predictive insights
- Increase automation

IMPROVE UTILIZATION

Integrate, connect and orchestrate automated systems, operator stations, workers and workflow tools to maximize throughput in existing facilities.

- Unlock new and hidden capacities
- Reduce variability hitting hourly/daily targets
- Solve business expansion challenges

INCREASE RELIABILITY

Combine sensors, controllers and devices to gather key inputs and deliver vital information on asset health and performance in real time.

- Predict equipment failure
- Reduce incidents and costly downtime
- Optimize system performance

MAXIMIZE PRODUCTIVITY

Link workers, robotics and automation to create an integrated ecosystem for safer, more productive DC operations.

- Communicate issues proactively
- Allocate resources intelligently
- Transition to automation to overcome human limitations

Is your DC keeping pace with e-commerce?

E-commerce and e-retail distribution volume is **accelerating 25%** annually.

Honeywell Intelligrated®
