MOMENTUM™

The next generation in warehouse execution systems.

- Built using a clean-sheet software approach to incorporate multiple modules of functionality into a unified code base.

SIMPLIFY COMPLEX FULFILLMENT OPERATIONS

Connect orders, labor and automation. Coordinate synchronous workflows. Re-prioritize orders based on customer demand.

SEE THE WHOLE PICTURE IN REAL TIME

Gain access to real-time order fulfillment status and visibility to in-process work to optimize order flow and avoid bottlenecks.

BUILD A SOLID FOUNDATION

Adapt to business changes without the complication of unsupportable multiple-vendor systems or the cost of unpredictable customizations.

JUST-IN-TIME ORDER CONSOLIDATION

Allocate demand based on put wall availability to optimize order consolidation, increase throughput and decrease congestion.

DYNAMIC SPACE ALLOCATION

Match product size and shape attributes to increase the storage density of AS/RS systems and pick locations.

MATCH THE SPEED OF COMMERCE

Meet the demands of tighter service level agreements, SKU proliferation, changing order profiles and seasonal demands with one powerful system.

How are you dealing with SKU proliferation?

The average DC now manages more than 14,000 SKUs.
