PALLETIZING AND DEPALLETIZING

MISSION-CRITICAL PALLETIZING

You'll find our palletizing equipment in a wide variety of applications, including: food and beverage, consumer packaged goods, manufacturing, distribution and fulfillment.

DYNAMIC PALLETIZING REQUIREMENTS

We provide the versatility to handle various layer patterns, product packaging configurations and container demands.

STANDARD OF RELIABILITY

Many of our Alvey® conventional palletizers have been in operation for more 30 years while handling a variety of products and patterns.

Increase throughput and reduce labor costs.

- Keep end-of-line manufacturing and omnichannel retail operations moving at industry-leading speeds with Honeywell Intelligrated's line of palletizers and depalletizers.

ROBOTIC AUTOMATION AND PRECISION

Robotic palletizers and end-of-arm tooling offer seamless scalability, increased pattern load flexibility and precision.

IMPROVE DEPALLETIZING EFFICIENCIES

Bring much-needed automation to labor-intensive depalletizing processes with semi-automatic and robotic solutions.

MAXIMUM DEPALLETIZING VERSATILITY

Handle single cases or full layers, coupled with integrated case singulation, pallet handling and stacking.

Your single source for palletizing solutions

Honeywell Intelligrated provides a wide range of pallet-handling products and accessories, available as stand-alone equipment or as part of a fully integrated system.
